Basic Web Hosting Terms Explained

Web hosting plans are equipped with different functions, tools and functionality to meet individual needs and budget. In this article, we discuss the basic features of a web hosting plan and which functions and instruments are best suited for your website. This will help you determine and verify the type of hosting plan that fits your needs on the website.

Disk space: Disk space is the amount of space offered by the hosting provider to store the files. When you start your search you will find out that various hosting companies have various offers as to disc space. It should have an estimate of your disk space requirements. Try to check how much space would be required to store email, web files, databases and log files.

Once a breakdown of these figures would be a better place to work, the share disk needed to host your website. So always keep a safety margin in selecting your disk space after your e-mail and log files may need to change your website grows.

Email Accounts

Email accounts are a common feature and essential features with hosting plans. It is imperative to have a great number of them, if your company has huge staff.

FTP Access

Most paid hosting accounts come with FTP access function. These FTP programs allow users to upload files and edit and delete content faster and more convenient than the web-based interface. In reality, it also hosts the opportunity to create own FTP account. This is a highly usable feature if you want to share your web space, while preserving user files separate from your own or someone if you want help on your website.

Bandwidth

This is an essential feature that should be considered in your choice of package. Choose the right amount of bandwidth is essential for the growth of your website. A wrong decision could either make or break your website. The amount of bandwidth or data transfer depends on the type of personal website. Once you have a rough estimate of the amount of bandwidth required for your website, make sure it suits your monthly budget hosting. For this you also need to ensure that the company has said all prices clearly and there are no hidden costs involved.

It needs mentioning that before you make your final choice you should certainly visit web hosting review sites. There you will find all information you might need to choose a reliable hosting company. By comparing hosting plans and companies you will learn pros and cons of different hosting providers. Comparison charts make it easy to contrast different hosts and learn much about their features, prices, terms and conditions etc.

Good luck with your site and make a smart choice. Beware of scams and frauds.
