# FAQ Of Web Hosting

Web hosting is the process of storing your web site on a web server hosting, which is always connected to the Internet. The easiest / cheapest web hosting packages simply provide a small amount of space and bandwidth that you can store what is called a static HTML site. These are the simplest form of websites. Static sites are not updated frequently and are usually only a source of basic information. Other dynamic web sites (web sites, amending and updating often) require a bit 'more from a hosting server. Therefore, before you decide on a host, it is important that you know exactly what type of site you want.

Where can I find information on the different web host?

Just Google it!

What makes a good web hosting company?

There are three main factors that should influence your decision when deciding on a Web site Hosting:

**SAFETY:** It 's necessary to ensure that the host has a proven track record of being safe and secure. Making sure they have the correct measurements to avoid being violated by any computer nerds side.

**RELIABILITY :** Check out host uptime track record. "Uptime" refers to the percentage of time that the hosts are actually online and people are actually able to access your site. Smaller, less famous guests tend to have a lot of downtime due to technical errors or problems with teething which is why the most popular Web companies which have been around the block and back, are a much better solution.

**SERVICE:** This is a huge factor. As a webmaster, you will need most likely to be in close contact with the hosting company on a regular basis. It is important to have adequate processes in place that allow contact without fuss or problems. Some companies have web instant messenger that lets you chat instantly for technical support. Others have dedicated emergency telephone lines which means that it will never be stuck in a queue caller.

Do not settle for anything but the best, even if it means you have to pay a little extra instead of free web hosting.

If the host local or abroad?

Technically speaking, not very important. In the past, they used cables are huge differences in response time if you were to log on to servers abroad, but thanks to fiber optics and other technical trends, is no longer a problem. Factors you need to consider, however, payment, cost and time zones.

Before you make your final choice make you to visit web hosting review sites which contain the most complete and up to date information on top web hosting providers. Compare prices, hosting plans and features to make the most well informed and conscious choice.
